

Round wood palette

Compact loading unit for transporting round wood

Possibilities of application:

- Volume-optimized loading unit for rail transport
- Increase in carrying capacity in comparison to wagon Ros: 5 t
- Increase in volume in comparison to wagon Ros: 4 %
- Multifunctional wagon concept with a base wagon
- Optimisation of the logistic chain

Innovation:

- Compact unit with low own weight
- Handling with standard 16t forklifts
- Possible to put down to the ground, preloading possible

Beraten. Entwickeln. Betreiben.

Technical data:

- ◆ Own weight of a unit: 900kg, fully galvanized
- ◆ Loading width for round wood: 2,700mm
- ◆ Stanchion height: 2,100mm
- ◆ Stanchion inner distance: 2,000mm, suitable for wood of length from 3m on
- ◆ Closed floor for easy cleaning, stable grab protection
- ◆ Clamping winch on the wagon, 2 eyelets per side on a palette

A basic wagon for transporting various products of wood and sawmill industry.

With WoodTainer XXL or innofold for wood chips, bark, biomass etc.

With round wood palette for round wood of various lengths (3, 4, 5 and 6m)

With 30ft bulk container for pellets (moisture protection)

Advantage: quick loading of preloaded palettes onto the wagon
