PAYLOAD UP TO 143.7T

- > The WoodTainer/MonTainer system is optimized for the transport of bulk goods and consists of high-performance special containers, light InnoWaggons and the appropriate unloading solution.
- > Suitable and strong containers are available for every type of bulk goods (light and heavy). For example: wood chips, waste paper, biomass, coal, coke, ores, cement, gypsum and contaminated earth.
- > As an integrated logistics solution, the WoodTainer/MonTainer system is developed in a way that the containers, together with the InnoWaggons, enable optimized loading with minimized train lengths.
- > Depending on customer needs we offer different unloading solutions — either forklifts or stationary unloading systems. Both systems guarantee efficient logistics and maximum operational safety under all conditions.

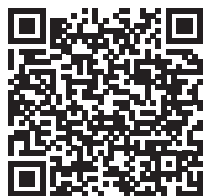

FORKLIFT

UNLOADING MACHINE

Benefits	Verified scale, scalable, flexible		Compact, sampling, semi-automatic	
Performance [m³/h]   [t/h]	600	500	1,200	1,000
Unloading time [min]	3-5		2	
Load capacity [t]	38		40
