

Extension of the SGW series

SGW Round & Sawn

Optimized transport of
round wood and sawn timber

www.innofreight.com

SmartGigaWood Round & Sawn

The SmartGigaWood Round & Sawn combines the high loading volume of Innofreight's SmartGigaWood series with the ability to transport sawn timber packages to minimize empty runs

System benefits:

- > Transport of round wood and sawn timber packages
- > High loading capacities
- > Full utilization of wagon capacity for track class D
- > Wagon runs in profile G1 without additional permits

Technical data:

- > 220 m³ loading volume (120 solid cubic meters round wood or 191 m³ sawn timber)
- > 144 t payload

Loading and unloading:

- > Logstacker and highlifter or crane and forklift
- > Transport securing with tension straps
